Section B

To be completed by a healthcare provider if student answers "YES" to any question in Section A OR additional risk factors were identified to warrant further testing.

Tuberculosis Skin Test (TST) Date of test: ___/___/___ Results: Negative Positive

OR

Interferon Gamma Release Assay (IGRA):
(QuantIFERON-TB Gold Plus (QFT-Plus) **OR** T-Spot TB)

Date of test: ___/___/___ Results: Negative Positive

Chest X-ray:
(required if current or previous TST or IGRA test is positive)

Date of test: ___/___/___ Results: Normal Abnormal

Bacteriologic examinations of sputum specimens, if indicated:

Date of test(s): Results: _____

*TB blood tests (and TB skin tests) should not be performed on people who have written documentation of a previous positive TB test result (TB blood test or TB skin test) or treatment for TB disease. Most people who have a positive TB test result will continue to have a positive test result. Additional TB blood tests will probably not contribute to medical care, regardless of the result.
