INTRODUCTION

This volume continues the updating of the General Bibliography of The Gambia and covers the years 1993-1995. But many items from earlier years which have been discovered, or confirmed, have been included. As most sections are arranged chronologically, these are found at the beginnings of the appropriate sections.

As usual, my main source has been the University of California system, with computerized catalogs- Gladys, the holdings at Berkeley, and Melvyl, the system wide list. The data base for current contents provides a wide range of materials appearing in scientific periodicals, while medical material appears in MEDLINE. The holdings at Stanford were consulted through Socrates.

The new San Francisco Main Public Library, with its abundant computers, also provides many leads - from current periodicals (EBSCO), the Library of Congress Catalog, and many more.

The inter-library loan section at San Francisco State University has always continued to be of great help in my search for materials.

However material published in The Gambia is still hard to come by, and there is a considerable time lag before one learns of many items.

Special thanks are due to the Librarian of the Gambia National Library for supplying the Annual National Bibliographies.

..to Heidi Skramstad for providing a catalog of the material at the Chr.Michelsens Institute, Fantoft, Norway.

..to Clare Madge for offprints of her work among the Jola.

..to Tamba Balde for copies of newspapers from The Gambia.

..to The Gambian Embassy in Washington for supplying Tourist Information.

As usual, I still have a bundle of left over cards, which I am still trying to trace and check.....

Brisbane, 16 March 1998
