INTRODUCTION

The following work is based primarily on research carried out in the
Library of the University of California in Berkeley,
The Medical Library of the University of California Medical School in San Francisco
The Main Public Library in San Francisco,
& The Library of San Francisco State University.

After work on the Bibliography had started I received a copy of The
Gambia National Bibliography: Annual Cumulation 1996-2000, published in 2001.
Many of the items listed are rarely to be found outside The Gambia. Consequently
I have incorporated many items into the present work, such items being
indicated by Source: GNB. Some items from the Library of Congress catalog
are shown by Source: LC. A very full bibliography on education was found in
Marcus Powell's An Analysis of Policy Implementation in The Third World (1999).

People in The Gambia who provided other materials are Pierre Gomez, who
was working on Gambian literature, and Ida Jallow.

Besides newspapers from The Gambia, the Internet, through Africa News Service,
provided the text of many articles, especially from the Independent.

In the present bibliography about 26% are items which I have not personally
seen, and are marked *. They are taken from other bibliographies and footnotes
in books and articles.

Twenty nine % are older items - which predate the year 2000.
